What are the best things about this class and your instructor?

Very good at explaining problems.
Fair with quizzes

What things need improvement? Any suggestions?

It would be very helpful if he spent just a little more time on the method of doing problems rather than just doing the problems for us, such as explaining what a theorem is or the concept of what we are going over. Also, seems to think of the class as lazy delinquents and seems to get angry when we don't do better.

cares about student success and

hard on us, but it's only because
he expects the best out of us.

What are the best things about this class and your instructor?

While he was pretty intense, he got me motivated to study harder, even if it was by making discouraging observations.

He always explained things to completion, and was very excited to do so.

Some times he moved through things sort of quickly, but I don't really ever feel as though it was a problem.

Other comments?

He is pretty intense, but I learned a lot from his discussions. He presents material in a slightly different manner than in lecture, which is sometimes helpful.

He always made my weak areas of knowledge clear to me, which helped me study
